

I am sick of the government using it's power to take freedom away!  
The air is free let Dj's speak how they wish, Since when is it the  
governments job to police what we hear? It's sad that people can't  
enjoy the things they like due to over bearing political zellets.  
If you don't like whats being said over the air then guess what  
that little button that tuned in the station that is not your  
taste will TUNE IT OUT AS WELL. "Oh" and that button that has power  
on it works as well. Get the government out of my radio!
